Fresh graduate in Smart City Information Systems from Politeknik Negeri Indramayu with strong expertise in fullstack development. Proficient in JavaScript, React, Node.js, PHP, and Laravel framework. Successfully developed a Blood Donation Mapping Information System in collaboration with PMI Indramayu, featuring real-time location tracking and inventory management. Experienced in administrative finance operations and large-scale printing projects. Detail-oriented problem solver with strong adaptability and ability to work under pressure. Seeking remote opportunities in IT or fullstack development roles.

## Work Experiences

**Ong Houseware - Bekasi, Indonesia**

Dec 2024 - Jan 2025

*Finance Assistant (Part-time)*

- Managed tax invoice data entry for hundreds of physical invoices using company's desktop application, ensuring accurate recording of tax codes and transaction details
- Implemented systematic verification process by cross-checking and categorizing processed invoices, maintaining organized documentation flow
- Assisted in payment verification and inventory tracking, monitoring product delivery status and purchase order completion
- Calculated and processed Value Added Tax (PPN) for transactions using Excel spreadsheets

**PT Harmony Sistem - Bekasi, Indonesia**

Jun 2025 - Aug 2025

*Computer Operator (Part-time)*

- Operated computer systems for large-scale printing project involving 300,000 diploma and transcript documents
- Downloaded and organized data from Google Drive, systematically sorting files according to serial number regulations to ensure proper document sequencing
- Managed data verification process to match diploma and transcript serial numbers, preventing documentation errors
- Performed dual responsibilities of computer operation and paper feeding, demonstrating flexibility in high-volume production environment

## Education Level

**Politeknik Negeri Indramayu - Indramayu, Indonesia**

Sep 2023 - Oct 2027 (Expected)

*Diploma IV (D4) Smart City Information Systems, 3.91/4.00*

- Focused on fullstack web development using React, Node.js, Laravel, and Bootstrap framework
- Learned database design, RESTful API development, and system integration for smart city applications
- Gained hands-on experience in JavaScript and PHP programming, responsive web design, and Git version control
- Developed Blood Donation Mapping Information System in collaboration with PMI Indramayu to improve accessibility of blood donation services
